Me es grato comunicar a Vds el resultado satisfactorio del nuevo examen quimico del 'Fluido Little' que acabo de practicar sobre una muestra de este especifico enviada por Vds a este laboratorio el 12 del corr. y fabricado por Morris Little e Hijo en Inglaterra.
Confrontando el analisis de esta muestra con mi analisis del mismo especifico practicado en Febrero de 1879 encuentro un aumento considerable en su grado de concentracion; su densidad es superior, la proporcion de fenoles contenidos en los aceites es mayor, y en una palabra lo considero no solo superior al producto primitivo, sino el mas concentrado y activo de cuantos de su clase he tenido ocasion de examinar hasta la fecha. Esta observacion se refiere, se entiende, esclusivamente a los especificos contra la sarna, que tienen por base los aceites Hidro carburados y fenoles del alquitran y que no deben su eficacia al arsenico, al azufre, o al tabaco, sustancias que no existen en el 'Fluido Little.' Apesar de su mayor concentracion el Fluido se mezcla con el agua fria con la misma facilidad y perfeccion como antes.
Me repito de Vds

FOR LENT
Moore & Tudor's
Fresh Gulf Shrimps, the most delicious novelty in preserved fish. Read the unaltered and unabridged report of the packer below. The shell is removed and canned 'au naturel' ready for the table put up in tins, two dozen in a box. Thoroughly cooked, and ready to be served as a Shrimp salad.—*The fresh Gulf Shrimp 'canned by our process' is one of the finest and most delicate entremets that can be offered at lunches and private suppers, or in families as a supplemental dish at breakfast or dinner, being sufficiently cooked, can be seasoned and served on the moment. Our Shrimps are put up natural, cooked in linen sacks, and thereby kept from direct contact with the tin. By this process their purity, original freshness and flavor is retained. On emptying from the sack, may be rinsed off in fresh water.*
Are oftener eaten as they are, cold, with or without seasoning, made up from the castor to suit your taste, than any other way. They relish admirably in a mayonnaise, also with all the usual green salads—each in their season—such as: Sweet Bell Pepper, Lettuce, Water Cresses, Celery, Raw Tomatoes, &c., &c. They garnish handsomely a boiled fish, and relish well with it. In warm cookery, a well seasoned sauce or gravy made to taste with or without Tomato, and the Shrimp added about the time of dishing, so as to become warmed without additional cooking, are very fine. Also for stuffing Tomatoes, Egg Plants, &c., in short there is no way in which they cannot be eaten with pleasure—avoiding, as far as convenient, any material additional cooking, for the reason that they may soften which somewhat detracts from their appearance, and their delicate flavor is partially lost trace of in the mixture. Our fresh Gulf Shrimp need no further cooking, but are ready for the table. Sold by best family grocers generally.

President Hayes has vetoed Funding Bill passed by Congress, for converting Bonds into others redeemable in five years and payable in 20, 3½ interest: and also authorizing issue of Treasury Certificates, redeemable in one year and payable in ten, interest 3½. Secretary of Treasury has resigned.

THE PERIHELION.

Nothing has fallen into greater disrepute in the present age than the casting of horoscopes; and the art of astrology is thrown up simply because we all pretty well know that the earth is not the centre of the Universe, but, on the contrary, an exceedingly diminutive part, and all the other constellations have rules, objects and programmes of their own, without moving about in the Heavens with no higher aim than influencing human affairs on the earth. Astrology has, therefore, in this age of grace given way to astronomy, and we have abandoned levelling prayers or imprecations at the heads or tails of comets, which are even to this day, in certain parts, by the superstitious, considered to presage disaster. So much does the world owe to the noble efforts of astronomers, that we leave it to our readers to say, but for their unwearied search after truth, where we should be all to-day, with such a melancholy state of affairs going on aloft as is depicted in the very able and interesting letter of Chevalier Hairby, commander of the Maskelyne, which we give at foot.

The Chevalier warns us that on the 18th of next month an event will occur aloft that has not happened since A.D. 1146. How much the world has changed since then is perhaps as great a study as what it will be when a similar conjunction of planets is repeated. The subject is so amazingly profound that we fear we cannot much improve on Captain Hairby's letter, yet it may convey consolation to many of our readers to know that the last occasion when a stellar phenomenon somewhat similar to that which is about to happen occurred was at the beginning of the last century, when all four of these wandering worlds, Jupiter, Uranus, Saturn and Neptune, the four of our largest planetary bodies, neared the sun almost simultaneously. That was in 1708, yet the record of those times tells us of no plagues or disasters, which feeble minds usually associate with such events. We are certainly at a loss to say why we should ascribe baleful powers to any conjunction of the countless hosts of Heaven. Astronomy affords us no ground for bringing charges against the other planets for disturbing the meteorological peace of the Heavens or altering the conditions of human life in this vale of tears. Professor Gould and others can well prove that the perturbing powers of these bodies is limited to slightly altering the elliptical orbit of the earth.

The Greeks called Jupiter 'Phaeton,' and the Egyptians called him 'the Brilliant.' In size he is the King of the Planets, yet whilst it takes Neptune 164 years to complete its movement round the sun, we know well that Jupiter sweeps round in less than one twelfth of that time; and as all the planets are at different distances from the sun, it follows that some of them approach the sun or are in Perihelion more frequently than others. We cannot see, therefore, any special cause for anxiety, as these events have occurred before and will occur again, and although many will associate the late terrible storm in England when the tide in the Thames rose 2 feet higher than ever known before with the Perihelion of these planets, we candidly think that it has about as much to do with it as the Peace of Utrecht in 1713 had to do with the Perihelion of 1708, or the great plague of London which occurred in 1665, 43 years before either Jupiter or Neptune even approached their perihelion.

In connection with Chevalier Hairby's remarkable letter we may remind our readers of Mother Shiptons prophecy, which, we learn from an English lady in Caballito, is still believed in throughout certain districts in England. Perhaps we shall never have a better opportunity of publishing it than now: here it is—

MOTHER SHIPTON'S PROPHECY
Copied from a work published in A.D. 1448, and now in the British Museum—

Carriages without horses shall go,
And accidents fill the world with woe
(Railways)
Around the world thoughts shall fly,
In the twinkling of an eye. (Telegraph)
Water shall yet more wonders do?
How strange, yet shall be true. (Steam)
The world upside down shall be
And gold be found at the root of a tree
Through hills man shall ride
And no horse or ass be at his side
Under water men shall walk
Shall ride, shall sleep, shall talk. (Tunnels)
In the air men shall be seen
In white, in black, in green. (Balloons)
Iron in the water shall float
As easy as a wooden boat. (Ironclads)
Gold shall be found and shown
In land that is not now known
(California mines)
Fire and water shall wonders do (Steam)
England shall at last admit a Jew
(Lord Beaconsfield)
The world to an end shall come
In eighteen hundred and eighty one.

Mother Shipton in her prophecy is almost as exact as the celebrated Dean Swift who predicted the death of Partridge, the almanack maker, at about 11 o'clock at night on 25th March next, and the approaching perihelia seems to have disorganized the nerves of some of our London colleagues, since not long ago, we saw in an English paper the following,

"Cheerful prospect for the year of grace 1881. 'There will be,' we are told, 'a universal carnival of

death. Diseases will appear, the nature of which will baffle the skill of the most eminent physicians.' Nor is this the worst; there is an even deeper horror beyond, for 'every drop of water in the earth, on the earth, and above the earth will be rendered more or less poisonous.'

Our knowledge of the conditions which render this globe of ours secure in unimperilled stability is now so enlarged, and our faith so fixed in the beneficent arrangement of the Solar system, that it is really lost labour to answer such absurdities; and we believe that astronomy has already reached that height from which we can look calmly on even the wandering careers of comets, whose very worst, should they come into collision with the earth, would be to produce a thin mist less dense than a London fog. The following is Chevalier Hairby's letter, published in *Iron*:—

CORRESPONDENCE. ON THE CONJUNCTION OF PLANETS DURING THE YEAR 1881.

To the Editor of Iron.

Sir,—If it be a fact, as seems to have been universally acknowledged, that by means of inductive physosophy all that we really know in the exact sciences and in natural physics has been reached, it must necessarily be conceded that the sheet-anchor of that method is continual, widespread and repeated observation. This being universally true of all science, it is especially so in the case of the sublimest of all sciences, viz., that of astronomy, by the aid of which we navigate every sea safely, calculate our distances accurately, and reach our destined harbours securely. These prefatory remarks may not seem out of place as an introduction to a subject to which I wish to draw your attention, and which is connected with the planetary phenomena and ephemera of the year 1881, the accurate observation of which will be of lasting use to the mercantile marine especially.

The constant changes which have occurred in the physical world during the last two years cannot have escaped the observation of those who study, even superficially, these subjects, and to enumerate the different phenomena which have taken place and which have been followed in so many cases by a long train of famine and suffering, would occupy too much space, as not even the deserts of Sahara and Atacama have escaped On the 26th September, 1880, the planet Jupiter was in perihelion at a distance of about 48,000,000 of miles nearer to the earth than the mean distance. It was nearest to the earth in 1879, when in opposition on the 31st of August, and it was probably this propinquity at that particular season, which caused the harvest of that year to be the worst seen during the century in Great Britain and Ireland. Jupiter was in opposition to the sun on the 7th October, 1880, shortly after perihelion: Saturn on the 18th of the same month, and during the whole of that period the storms in both hemispheres were unusually severe. But now two planets, the most potent of the sun's planetary system — the relative masses of the Earth, Saturn, Jupiter, and Sun being as 1, 111, 370, 318,000 — are approaching an event when their joint masses, *i. e.*, 370 and 111, or 481 earths, will be added directly to the mass of the sun and put into exercise, with what effect remains to be seen. I allude to the coming coniunction of these planets, which will take place on the 18th April, 1881, at 2 hours, 4 min., 56 secs., Greenwich mean time. This particular conjunction has not taken place (in the sign. Taurus) since the year A. D., 1146, a period of 735 years, and it is needless to say that at that time astronomic and climatic observations were not very numerous. The nearness of both these planets, Jupiter and Saturn, to the Sun and Earth (as Jupiter has just passed perihelion and Saturn is approaching it) will render this conjunction of unusual interest in physics. Later on in the year, *i. e.*, on the 6th July, 1881, Mars and Saturn will be in conjunction, and on July 22nd, 1881, Mars and Jupiter. The occurrence of these conjunctions, if well observed over wide areas (and it is certain they will be) cannot fail to add materially to our astronomic and climatic knowledge.

It will possibly be said that this is a subject for astronomers proper, and with some reason I admit; but as the writer passes at least nine months of the twelve on the North and South Atlantic, a warning to his brother seamen and those living on our coasts, the banks of tidal rivers, &c, may not appear out of place, — I am, &c.

EDITOR'S TABLE.

The Drought is getting serious. 'Algibes' and wells are drying up in town and camp; the *Standard* barometer is as immovable as the Rock of Gibraltar, and there is no sign of rain. Captain Chevalier Hairby's most interesting letter in another column may be read by some as in connection with the present weather: the conjunction of the two great planets is apparently playing Old Harry with the weather in Europe, and why not here?

The most unimpeachable instance of *Standard* luck on record occurred yesterday morning. Mr Chute, of the firm of Chute and Brook, the eminent photographers, has for 15 years past wooed *Miss* Fortune, through the medium of Lottery tickets. but the lady persistently refused even the faintest smile, and the old buffer who has acted as Love's messenger and 'lotero' during the time specified, at last got almost ashamed to look Mr. C. straight in the face. Yesterday morning as Mr. Chute was about to sit down to breakfast, the 'lotero' dashed upstairs like a flash of greased lightning, shouting, 'you have it, you have it! el grande, el grande!' and embraced Mr. C. with an effusion that a dozen Frenchmen combined could not emulate. Mr. Chute, half-choked, threw the man off, thinking he was 'off his head,' and exclaimed with King John, 'I cannot Brook thy sight;' but the 'lotero' charged him again, and after another tremendous hug, told him that his ticket, No. 4531, had won 16,000 patacons gold in the Caridad Lottery. Mr. Chute called for the Extract, but the man had it not, and they both rushed to the agency with the speed of One-eyed Deer with the hounds at their heels. The Extract confirmed the good news, and Mr. Chute left last night for Montevideo to pocket the coin, having first taken a photograph of the winning ticket. Our lucky subscriber has taken many a 'negative' in his day, but, we venture to say that he never took such a pleasing 'positive' in his life before as the 'photo' of 4531. We warmly congratulate Mr. Chute on his great luck, after fifteen years' disappointment.

Everybody wants to know who won the $300,000 in the Emprestito Popular Drawing. We hope not the School Board again,

Our next Packet Edition will appear on Friday next, for the R.M.S. Trent, which will sail on following day, 12th.

The heat is so woeful that the only way of passing to-day pleasantly, that we can conscientiously recommend, is to make for Calzetta Island at the Tigre, where 'far from the madding Dust' some enjoyment and rest may be had. Until our planetary friend Jupiter gets into a Pluvius mood, life in town, especially on Sundays, will continue to be martyrdom.

The news of the day is Mr. Nicholas Calvo's scheme to bring out 50,000 European emigrants, if the National Government will give them free grants of land. We should think it will 'con gusto,' Fifty thousand is a big figure, however, one-half of the total emigration from Germany last year; and if Mr. Calvo limit his intentions to one fifth of it (to begin with) he will have much greater chances of success. We need scarcly assure him that we are heart and soul 'a su disposicion' in his patriotic project.

The papers tell an amusing story of a dandy of that type which our facetious contemporary *Punch* delights to call a 'gent.' The creature was standing at the corner of Calles Defensa and Moreno, ogling a pretty girl in an 'altos' window, who, getting disgusted with the cad's impertinence, retired, closing the window with an indignant bang' While the little peacock (he is about 4½ feet high) was looking round in confusion, to see if anybody had remarked the snub he had received, a stone, hurled by the girl's little brother, from a corner of the 'azotea struck him fair between the eyes and laid him on the broad to his back. The youngster gave a victorious yell and disappeared from the roof, while the police carried the 'gent' to hospital for repairs.

The French lyric company will debut at the Opera House next week in Halevy's Charles VI.

Exhibits for the Italian Exhibition, to open this month, are now arriving from the Interior. This Exhibition will far surpass anything of the kind as yet attempted in this country.

On! that meeting in Plaza Retiro! That meeting! We'll never get over it. The Italians, French and Spaniards in Rio Cuarto abstained from all participation in Carnival, as a mark of respect to the memory of their countrymen who were killed at Chorillos and Miraflores!!! Well, this beats Tom Walker himself. What are the odds that the anniversary of this imaginary massacre will not be celebrated next year?

We read in the columns of our amiable colleague, the *Deutsche La Plata Zeitung*, a letter from Hanover which shows that the German emigrating classes are now turning their attention to the River Plate as a suitable home for adoption. The writer, Federico Scheich, of Guarrenburg, Hanover, addresses our colleague on behalf of *several hundred* families who are anxious to emigrate to this country, as they are literally starving at home, as meat and even grease are now articles of luxury for the working and farming classes, owing to the great depression of trade in Germany. We have no doubt our colleague, who has always shown great interest in Immigration, will send Mr. Scheich all the information he asks for, and we also trust that the National Government will 'take the ball at the hop,' and at once carry into effect its resolve to send an agent to Germany to bring this country properly under the notice of the emigrating classes there. Dean Dillon will go to Ireland for the same purpose, and an influential Scotch estanciero in the south told us yesterday that he is willing to go home to the 'land of cakes' on the same errand, as he could bring out some hundreds of families he knows, if liberal terms are offered to them. We have a fair stream of Latin blood to our shores, but want some Saxon, Celtic and Teutonic fluid to put grit and genuine backbone into the cosmopolitan race of Argentines now being formed.

We strongly recommend those who know a ship from a bullock-cart to drop into the Centro Industrial Argentino and examine the beautiful model of a ship made by Dn. Manuel Armigo, a Porteño, who must have decided nautical tastes (although it is stated that he knows nothing whatever of the sea or ships) to turn out such a perfect bit of work. It took him five years to do it.

It is considered probable that the Board of Health will soon reduce the quarantine on vessels from Brazil, in view of the pleasing fact that yellow fever has very much decreased in Rio Janeiro.

The newly-elected Paris Municipality consists of 18 merchants and manufacturers, 15 journalists or publicists, 12 doctors. seven barristers, six professors or schoolmasters, three engineers, one architect, one contractor, one engraver, one solicitor, one notary, one fluancier and ten men of independent means or nondescripts. The twelve doctors are Republicans to a man, and five of them Extreme Republicans. This is not peculiar to Paris, for all, or very nearly all, the medical men in the Senate and Chamber are likewise Republicans. There are only two editors in the Buenos Aires Municipality—self and Frere Walls—but there is a fair supply of doctors and an ample one of nondescripts. There should be double the number of membere, as the work it far too heavy for the present Board.

We are most happy to hear that Dr, Moreno is rapidly recovering, although the excessive heat of the weather is against him.

The *Independiente* says that the Carnival in Rosario was miserably dull; Corso too long and the 'comparsas' done up before they got over half the distance.

The corpse of a man, naked, with the legs and arms tied, was found in a sack yesterday morning in a corner of a piece of waste ground 'esquina Piedras and Garay. It is supposed to be a Carnival crime.

One of San Martin and Belgrano's heroes, named Barros, is now earning a precarious livelihood in his old age, in Cordoba, by working as a gardener. The ingratitude of Republics is proverbial.

In an Eastern Prussian town a baker tried to imitate Dr Tanner's fast, but after 25 days he showed such signs of weakness that the police carried him off and forced food down his throat.

A woman with a child in her arms has lately been soliciting alms from several of the English houses. She gives her name as Mrs Burt, and states that her husband was killed by a fall from his horse while employed at the estancia of Mr James Murray, Marcos Paz. Perhaps some of our readers can tell us if her story is true and if her case is a deserving one.

'J. L. L.,' a distinguished contributor to our valuable colleague *El Industrial*, sounds a serious note of warning to importing merchants, and emphatically declares that they are hurrying on another crisis, like that of 1874, as fast as they can. He says the Customs deposits are bursting with goods, yet there is a cry for more room; while the torrent of imports still pouring in is out of all reasonable proportion with the population of the country or its most extravagant or probable wants. J. L. L. winds up as follows:—"Stop importing, or bankruptcy is imminent, and on a far more destructive scale than in 1874 and the following years." According to the European theory of a crisis every ten years or so, another will soon be due in the Plate, and J. L. L. evidently has his eye on it.

Dr. Rocha, Governor Elert, and party, left yesterday morning for Dolores in a special train, placed at their orders by Mr, Cooper. There was a large crowd at the station, and Dr. Rocha was loudly cheered as the train moved off.

We call the attention of our Giles readers to a notice in another column from Mr. Fernando del Rio, the well known notary. It is important for property-holders in that district

CORONER'S INQUESTS.

B. Aires, May 2d, 1880.

To the Editor of the *Standard*

Sir

Seeing that your paper has advocated the introduction of the system of 'Coroner's inquests' in suspicious cases of death from poisoning,

I take the liberty of bringing under your notice also the urgent necessity there is of having some revision of the laws relating to 'Accidental death on Railroads.'

It seems that a driver who is unfortunate enough to unavoidably run over any person at night or even in daylight at level crossings is considered as a murderer. (The present Criminal Code making no distinction in these cases between the capital charge, and manslaughter.) He and his fireman are immediately marched off from their engine to prison, and associated with the vilest criminals, where they languish for months until, through the intercession of their Company and certain formalities being gone through, they are released, very often on bail only.

There are now, though the general public may not be aware of it, some half a dozen of my countrymen in prison for this offence, and with very little prospect of getting out for months to come, (some of them are married and with families,) awaiting this tedious process of release.

Surely no enlightened Argentine can imagine for a moment that any engineman would be insane enough to give steam to his engine with a view to wilfully running over and killing any person on the track or even (as is often the case) lying asleep or drunk on the rails, when an enquiry would shew him that in all cases where danger of killing has been observed in time, the engines have been reversed and brakes put hard on.

I venture to say that should the authorities be misguided enough to sentence any of these men to any lengthened term of imprisonment the effect would be to produce a terrorism, sufficient to compel most enginemen and firemen to leave their situations.

As a free country and in the interest of progress, one would imagine that it would be one of the first duties of Government to remove all obstacles in the way of Railway enterprise in this country, and by settling this wretched legal quibble avoid embarrassing Railway Management, and guarantee to a certain extent security of person to rail way servants.

I ask you Mr Editor as an advocate of fair play to publish these few remarks, so that the public may be enlightened in the matter, and some steps taken towards releasing the poor men now in prison.

Yours truly

Driver.

Bonos Provinciales at ⅝ prem. Bullrich's 'Venado Tuerto' auction fairly stripped the Bolsa, and many well known Bolsa goers spent the day at Bullrich's.

The auction of the 'Venado Tuerto' lands to-day by Bullrich was the most brilliant success ever witnessed in this market, and establishes the fact that at last people are opening their eyes to the real value of really good camp. The auction mart was dressed as a banquet saloon and fully 200 persons assisted at the lunch, men of every walk in life, and it is worthy of remark that in the crowd and in the long list of lots sold there was not a single lot or a league of the land sold to an Argentine, which goes to prove that foreigners have more faith in the value of lands than even Argentines themselves. Mr Bullrich opened the auction with a good smart speech, alluding to his stable yard being turned into a banquet hall, and to the long list of men who had purchased in his yard and made fortunes by their purchases. He spoke of the value of good estancia lands in this country and the relative value of such lands in Australia, and wound up with a stiff peroration about the protest of Cordoba, which amounted to nothing, and finally gave the terms of sale. The lots were put up and sold as follows—

1, 2, 3, 4¼ sq. leagues at 128,000, 576,000, J. Feeley. Total 11,037,125 m/c.

At the close of the auction there was one burst of applause. Every league of the land was sold, and at prices which astonished every one, and many parties who had come into town especially to buy were unable to buy anything, as they hung back waiting for the last lots, which sold at $145,000 and $155,000 the league, when the parties in question had hoped to buy at 80,000 or 100,000 per league. Premiums were offered for the 'boletos' of some of the land before the bidders left the auction mart; one party refused $50,000 for a boleto for four leagues, and, in fact, from what we could see, some of the strongest buyers remained over without a league, and will now have to purchase at a premium. To the enterprize of Messrs. Casey, who carried this business through successfully, we must pay indeed the very highest compliment. The business gives these gentlemen a net profit of over 6 millions currency, besides 4 square leagues in the centre of the land which they have reserved for the land. 'Tis well to know that 4 or 5 buyers will immediately drive out their stock in the land, and some of the flocks of Giles will before a month is about be feeding on the Venado Tuerto. The sale has a towering significance for this market, and shews what can be done when people know how to go about it. One party who got a toss from his horse when out viewing the land was unable to attend, but his representative purchased 4 splendid leagues of camp at $205,000, proving what we all along said, that the men who had gone over the land and seen it would pay the best prices, as they knew its worth.

We regret to report the destruction by fire of Bartoli's cheese factory in Moron; the loss we hear is considerable. The cheese factories in this country are now doing so large a business that the import of foreign cheeses has greatly fallen off. The Mechanical School of Artes y Oficios in Montevideo has also been burnt down, which is indeed a loss for Montevideo. Last year we had occasion to see this fine school and admire the building and its arrangements; the school met a very serious want and will have to be replaced.

Don Alejandro Paz, one of our leading brokers who not long since returned from Europe, will sail on Thursday in the Umberto I for the Mediterranean; he has been appointed Consul General in France and also special agent to purchase the railway rolling stock for the Government railways. Both posts he is well able to fill, and he takes with him one of the Western Railway staff to superintend his purchases.

The National Government, we are happy to learn, has definitely appointed Don Enrique O'Gorman manager of the Penitentiary, a post which he so worthily filled, when that place was Provincial.

The fine city site corner of Calle Sta. Fe and Artes was sold yesterday by auction, 18x35, for $160,000; Mr Nicholas Lowe buyer. Mr Lowe is the owner of the adjoining site, and now has a corner site of 41x45 in one of the highest and best parts of town. The house Calle Esmeralda No. 641 also sold for 105,000 m/c Mr Quesada buyer.

We call the attention of capitalists to the notice from the Municipality calling for bids for the farming of the Mercado del Plata till the end of the year; the bids to be opened on 18th inst. The present lessees of this market they say made 18 millions out of the contract being one of the richest at the disposal of the Municipality, but many are of opinion that such properties should not be farmed but held by the Municipality and managed by an administrator.

Advices from Antwerp report that the stock of hides in that market had decreased some 80,000 hides. The latest advices from Antwerp by circular about the turn out of our new wools is much more favorable. Messrs Oostendorp, under date Feb. 1st, 1881, say:—"The Buenos Aires wools lately received are very good and compare well with those of preceding season, but they yield has in most instances been overestimated at the River Plate. The new clip Montevideo shipments are also of satisfactory quality being well grown and dry in grease."

The National Government telegraph line from Patagones to Choel-Choel has only cost 21,752 fuertes being at the rate of $f.68.50 cts. per kilometer, which is indeed cheap, and shows how well the Government does its own work.

The Villarino in her last trip down to Patagones made the run in 52 hours; the quickest run on record.

The number of immigrants arrived last month shows pretty clearly that our great life current from Europe shows no falling off, and is as strong as ever. The news we gave in our last from the colonies is really the best we have seen for some time, and the Swiss and Germans who are now arriving are all starting as medianeros on wheat farms in the new colonies. No wonder that the lands adjoining the colonies are selling so fast; at the rate Sta. Fe is going ahead soon that province will be one vast colony.

The National Government, we hear, is about to buy the "dique San Fernando". We recommend to the Minister also the "dredge", the best in the country, it was brought out by Mr Wheelwright for Mr Hopkins, and works with 5 men whilst other dredges require 30 men; it can be had cheap, and the owners will give it on trial first to prove the real worth.

The mails bring us very important advices from France. The French shipping bounty bill was finally passed by both houses of the Legislature on the 21st Jan. The law has undergone some changes since first introduced, but we gather from our London colleagues, who are all up in arms at it, the following:—

"On Thursday the French Senate passed by 256 votes to 5 the new Merchant Shipping Bill, the object of which is to stimulate by means of bounties the French shipbuilding and shipping trades. It is proposed to pay a bounty of from 16 to 60 francs per gross ton upon all vessels built in France, in addition to a duty of 6 francs per ton upon the engines and machinery of steamships, these payments being professedly made as an equivalent for the import duties levied upon shipbuilding materials. Then as to navigation vessels in the oversea trade are to receive a bounty of 1½ francs per ton not for every 1,000 miles run, this payment diminishing year by year until it ceases after 20 years in the case of iron and steel, and after 30 years in that of wooden vessels. On foreign-built ships that have been naturalised only one-half of these bounties on navigation are to be allowed, the object of course being to afford additional protection to the French shipbuilders. The Bill was voted by the Chamber of Deputies last session, but the Senate in Committee had further accentuated the protectionist character of the measure. The Deputies proposed two sets of bounties; the first one of frs.20 frs.40, or frs.60 per ton gross on ships built in France, of wood, mixed wood and iron, or iron or steel respectively, and a further frs 6 per ton, on the engines and machinery put on board; the second, a bounty on navigation per 1,000 miles run in oversea voyages, decreasing in amount with the age of the vessel, and which it was estimated officially would give from frs.18 to frs.54 per ton per annum for steamers, and from fr.6 to frs.18 per ton for sailing vessels. But it was implied that foreign-built vessels imported to France without the bounty on construction would share equally with French-built vessels in the bounty on navigation if placed on the French register, and sailing under the French flag. The Senate Committee has, however, reduced the bounty on navigation one-half for foreign-built vessels. This amendment is intended to destroy the trade of shipbuilding in England for French owners, which is increasing in importance, as the imports of iron vessels from England were 46,248 tons in 1880, against 16,554 tons in 1879, and 12,568 tons only in 1878. These bounties are to be granted as an experiment for ten years."

We extract the following from Messrs Wissner and Chapeaurouge's important circular:—

"Arrivals of the week—

	Wheat	Flour.
	—	—
	Fanegas.	Bags.
By West. Railway	6,936	38
By Southern Railway	1,500	—
By Boca and rivers	3,124	5,014
	11,560	5,052

"The agglomeration of stock during Carnival gave rise to a fall in prices, which was immediately taken up by millers. All the River wheat has been sold at $170 to 175 m/c per fanega of 9 ar. The stock is insignificant. A lot of Costa wheat has been sold at $200 per fan. Prices are firm. The flour arrivals have been important, but such is the demand that they are not felt." The maize is coming in; the grain is yet very soft; prices range from $50 to 55 per fanega."

We have received the following for publication in this column:—

To the Editor of the *Standard*,

Sir,

As you are a member of the Town Council you should look after the money belonging to same and not overlook that 130,000 m/c out of the 655,545 m/c ought to have been collected from the Banco Argentino in 1875, say about six years ago.

In the interest of fair dealings you should also contribute to the abolition of the eternal "moratorias" conceded to the Banco Argentino, that have ruined several of its creditors.

La figura de este campo es la de un cuadrilongo perfecto, y los interesados pueden enviar por planos a nuestra casa.

TREN ESPRESO IDA Y VUELTA
Que tendra lugar los dias 25, 26 y 27 de Marzo.

Habiendo vendido el magnifico y valioso establecimiento conocido por Blandengues, al Sr D Benito Lando y no habiendo entrado en esa venta los ganados finos de todas las especies, el propietario nos ha autorizado para proceder a su realizacion en remate publico, en lotes pequeños al gusto de los compradores.

Como las haciendas de que se trata son casi en su mayor parte finas y cuya venta demandara mas tiempo necesitandose como es consiguiento mas de un dia de remate, y en el deseo de que los señores que quieran asistir a el, puedan hacerlo con toda comodidad, hemos creido conveniente fijar la gran feria para tres dias, y en oportunidad anunciaremos el dia y hora de la salida del tren espreso.

El establecimiento Blandengues es celebre por sus crias finas y aunque nunca ha presentado sus productos en los remates que se dan en la ciudad.

Todos los criadores de la Republica saben que alli no se han encontrado dinero, ni se han ahorrado gastos para estar a la vanguardia de los primeros establecimientos del pais, y asi es que desde muchos años atras se han introducido alli los mejores animales que se necesitaban para el refinamiento de las razas tanto lanar como caballar, yeguarizo y vacuno de todo lo cual hay animales especiales, ya sean puros como mestizos.

Las especies que existen en 'Blandengues' se componen de majadas, tipos de cabaña en ovejas y padres puros Rambouillet de la Cabaña Imperial, hoy Nacional de Francia, majadas Lincoln servidas por carneros puros importados directamente de Europa, majadas finas Rambouillet, yeguas puras Normandas, yeguas para sangre de carrera importadas de Inglaterra. En esta raza (la yeguarina) hay animales notables y de gran merito, de distintas razas, servidas por magnificos padrillos puros introducidos directamente de Europa y lo mejor que ha venido al pais.

En el ganado vacuno mestizo hay animales de mucho merito, y en cuanto a lo puro, hay vacas, vaquillonas y toros de la raza Durham que estamos seguros no dejaran nada que desear. El anticipar esto vale a los señores hacendados tanto de esta Republica como de la Oriental e Imperio del Brazil, lo hacemos con el objeto de que se vengan preparando para este remate que podemos reputar como el mas importante que se ha dado hasta hoy entre nosotros de ganados finos de todas las especies.

Hoy que esta demostrado de una manera evidente que la riqueza de nuestra tierra consiste en la ganaderia, y en cuanto mas nos dediquemos a su refinamiento, tanto mas aumenta la riqueza publica y privada por el valor que toman las especies y los campos, nos parece oportuno llamar la atencion de los Sres. Hacendados, para que con tiempo se preparen a adquirir animales finos de toda especie nacidos en el pais e importados directamente, ya aclimatados y que no se ofrecen todos los dias en venta.

Por orden del Directorio del

The Boer Rebellion.

Last Friday at Cape Town two deputations waited upon His Excellency the Administrator, at Government House, Cape Town, for the purpose of representing the strong feeling in the Cape Colony that the Transvaal difficulty should be settled without bloodshed. Both deputations were composed of representative men of various shades of opinion, but the former was more directly an embodiment of the Dutch-Africander element. Messrs Hofmeyr, Van der Byl, Myburgh, Krige and J W Hofmeyr formed the first deputation.

Mr Hofmeyr said that a resolution to the following effect was arrived at at a meeting held in Stellenbosch:—That a deputation be appointed to wait upon the Government for the purpose of strongly insisting on the necessity of their availing themselves of every means in their power to prevent a collision with the Transvaal.

His Excellency—I should be glad perhaps if something else were put instead of the word 'insist,' as it is going before Government. With that exception I shall be perfectly ready to receive the resolution.

Mr Hofmeyr explained that the word 'insist' was not the proper translation, and intimated 'impress' would be quite satisfactory.

The Administrator concurred.

Mr Hofmeyr—There is nothing definite laid down in this resolution, but the great object of Stellenbosch in sending this deputation to your Excellency, and the Government, and, indeed, the great object desired by all people in the colony, is, if possible, to prevent a collision in the Transvaal, on account of reasons which I shall have the honour of stating. We feel that it would be a greater calamity under any circumstances, or at any time, but more especially at the present, when we are engaged in a war with the Basutos, Tembus, and the Pondomise, and are straining all our resources to quell those disturbances. We believe a war would encourage the Basutos to persist in their rebellion; other tribes would also feel encouraged to rise, and those which have risen to continue to resist. We believe it would have a most detrimental effect on the Free State farmers, who already labour under the imputation of assisting the rebels.

His Excellency—At this stage, it is only right to say that the Colonial Government has received from the Government of the Free State the most hearty and cordial assistance in any matters which they had to communicate with them upon.

Mr. Hofmeyr: But, Your Excellency, blood is thicker than water, and it stands to reason that if a war were to break out in the Transvaal, in which the Dutch and English would be opposed to each other, the Free State people will not draw nice distinctions, but it will be a war between Englishmen and Dutchmen in the Transvaal, and between Englishmen and Basutos here, and it stands to reason that there will be some sympathy, more or less. And, taking this colony itself, the great majority of the inhabitants are of the same stock as the people in the Transvaal, and at the time of the annexation of that country, I believe a large party condemned it. There is a strong feeling of sympathy, or pity, or blood relationship subsisting between the two populations. If the difficulty might be stopped in the way I have suggested, it might be further stopped, or solved altogether, by sending a Commission to the Transvaal, composed of gentlemen direct from England, or gentlemen living in this colony. The other deputation will suggest the same thing, I believe, and the gentlemen present are perfectly willing that Sir Henry de Villiers should go. He is an Africander by birth, and he possesses the confidence of both the English and the Dutch, and he would be able to obtain a hearing, whereas some others might not, and he would be able to enter into the difficulties in a manner which others could not. He may be able to point out to them the uselessness of resistance, and the agitation for independence, and they may change their efforts for those for liberal institutions under the British flag. I think if your Excellency were to communicate this to the Home Government it might do some good.

John X Merriman said; Your Excellency, this deputation, some of the members of which are members of Parliament, come to present a resolution arrived at, at a meeting held yesterday. We are very anxious about this Transvaal matter. We see the agitation which is going on through this end of the colony, and must be expected to go through the whole of the colony, because it is no use disguising the fact that there is a great deal of sympathy felt between the inhabitants and those of the Transvaal. It seems to us that it will be best to send some one to the Transvaal who will be trusted by every one in South Africa, and who has a fellow-feeling with the people involved in the dispute, and who will thoroughly understand their feelings, and be trusted by the Government and the people. Whatever he did he would have the feeling that those people in the colony who sympathise deeply and take an interest in Transvaal affairs would support him in what he is doing, and that would be a great point gained, because any steps taken should be taken by a person who feels he has the support of the colony. The following is the resolution:—

'That this deputation in common with the rest of South Africa, deplores the unhappy state of affairs now existing across the Vaal River, and ventures to urge upon Her Majesty's Government that, in order to effect a settlement of the differences which have arisen, and to establish tranquillity, it is desirable that some person acquainted with the feeling and opinion of the inhabitants, and possessing the confidence of all parties in South Africa, should be appointed as a special commissioner to inquire into and report upon the exact position of affairs, the feelings and wishes of those interested, and what arrangements would be most advantageous to the country, and most likely to reconcile the inhabitants to the Government of the Queen. And the deputation would further respectfully suggest that the Chief Justice of the Cape Colony, Sir J H de Villiers, possesses in an eminent degree the qualifications required for such an office.'

His Excellency: I need not say that I am very glad to see you, and I only wish it had been under circumstances of a more pleasant nature. I should perhaps just remind you of the fact of which most of you are aware, that the affairs of the Transvaal are no longer under the control of the Government of the Cape. With regard to the resolution you have sent me I shall be quite prepared to send it to the Secretary of State by telegraph. It doing so I trust you will understand that I am simply a means of conveying your wishes to the Secretary of State, and that it is not for me to enter into any discussion, especially at a time when I have little or no official information as to the affairs of the Transvaal, as to the advisability or otherwise of your wishes being met in the manner suggested. I have already telegraphed to Sir George Pomeroy Colley informing him of the great interest existing in this colony as to the affairs of the Transvaal, and I have asked him to keep me informed from time to time as to the state of matters there, so that we may be in a position to contradict any idle rumours that may arise, and to form an opinion, from official sources, as to what the position is. I can only say on my own part, and on behalf of the Colonial Government—as I informed the previous deputation—that it is our anxious desire that no collision should take place, and we are most anxious that bloodshed should not take place, and that order may be restored by other means than that of resort to force. I do not know that I have much more to say, but I am sure I am expressing the opinion (turning to Mr Sprigg) of yourself and your colleagues when I say that; and I can also enter into the feelings of the deputation when they point out to me the difficulties that would arise, the increased difficulties which would be occasioned by any collision in the Transvaal. We are fully alive to that.

The interview then terminated.

B. A. Z. C. C. v ADELA

This match was played in delightful weather at Chascomus on Monday Feb. 28th, and resulted in an easy victory for the Adela Club, although it must be remarked that the Zingari Club could only muster nine men all told. The bowling of Messrs J E Dodds and P Mulhall was so effective that run-getting was very slow. Between Innings full justice was done by the players and visitors to a sumptuous lunch provided for the occasion by the Adela Club.

The dinner at the hotel Selestreme was an enjoyable and happy meeting, the speeches were numerous but short and appropriate, and the toasts were all given with musical honours. Mr Jones was enthusiastically cheered when he announced that the Juez de Paz had invited the visitors to a short dance at the Municipal Hall that evening.

On Tuesday night a grand ball was given by Mr Auld, which commenced as early as eight o'clock p.m. and was kept up without cessation till 5 o'clock a.m., when a rush was made for the early train to town. The thanks of the visitors are due to Mr Auld for his great kindness and magnificent hospitality which will be remembered for a long time, as one and all confessed they had never spent such a happy time before.

Host and Hostess Selestreme acquitted themselves to the satisfaction of everyone, the accommodation generally being first class.

Appended is the score.

Dr. J. COLLIS BROWNE'S

(Ex Army Medical Staff)

CHLORODYNE

IS THE ORIGINAL AND ONLY GENUINE.

CAUTION.—Vice-Chancellor Sir W. P. Wood stated that Dr. J Collis Browne was undoubtedly the inventor of Chlorodyne; that the story of the defendant, Freeman, being the inventor was deliberately untrue, which he regretted had been sworn to. Eminent hospital physicians of London stated that Dr. J. Collis Browne was the discoverer of Chlorodyne; that they prescribe it largely, and mean no other than Dr. Browne's.—*See Times*, July 13th 1864.

The Public, therefore, are cautioned against using any other than

Dr. J. Collis Browne's Chlorodyne.

REMEDIAL USES AND ACTION.

This invaluable remedy produces quiet, refreshing sleep, relieves pain, calms the system, restores the deranged functions, and stimulates healthy action of the secretions of the body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, while medical men extol its virtues most extensively.

CHLORODYNE is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best remedy known for coughs, consumption, bronchitis, asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases—Diptheria, Fever, Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitations and Spasms.

CHLORODYNE the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis &c.

Extracts from Medical Opinions.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport, that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne. *See Lancet*, Dec. 31st, 1864.

From A. Montgomery, Esq. late Inspector of Hospitals, Bombay. 'Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when other remedies had failed.

Dr. Lowe, Medical Missionary in India, reports (December 1865) that in nearly every case of Cholera in which Dr. J. Collin Browne's Chlorodyne was administered, the patient recovered.

Extract from the General Board of Health, London, as to its efficacy in Cholera. 'So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases.

See leading article, *Pharmaceutical Journal*, August 1st, 1860, which states that Dr. J. Collis Browne was the inventor of Chlorodyne, that it is always right to use his preparation when Chlorodyne is ordered.

CAUTION. None genuine without the words 'Dr. J. Collis Browne' on the Government Stamp. Overwhelming medical testimony accompanies each bottle.
